Fittings & Flow Diagram Purestream Water Filters BLCE ECE Adding Wellness to Water Waste Water Tube (BLACK) Tube (MOO)e Carbon Cartridge Pure Water MEMBRANE Carbon cartridge FLOW >> Dirt & Sand cartridge Mineraliser and/or Alkalising Cartridge WHITE TUBING replaces Cartridge No. 4 From Tap Fitting

To make the connection, push

the hose firmly into the collet.

To remove the hose - Remove red clip. Push onto

the collet and at the same time pull out the hose.

Countertop Reverse Osmosis

- 1. Remove red locking clip. To disconnect push collett in push fitting at end of each cartridge back on itself and pull tubing out. You may need to put fingers on each side of the tubing to release. Throw old cartridges away.
- 2. Install new inline cartridges as per diagram noting flow of water identified by arrow on cartridge.
- 3. Now is the time to flush membrane using the flushing service mode. Turn the blue / black handle

of the stop valve located in the black waste line for approx. 1 – 2 minutes.

Water should only come out of the black tubing.

We also recommend you hold on to the black tubing as water will come out with

force.

Make sure the hose is pushed as far as it can

go and secure with a John Guest red clip.
